

Vandalia Health

FACT SHEET

On September 1, 2022, CAMC Health System and Mon Health System combined to create Vandalia Health. Since then, Vandalia Health has continued to grow adding several hospitals and another system, Davis Health System.

Why name this multi-state health system Vandalia? The name draws on the history of our region. In the 1700s, Vandalia was the name the British gave our territory including – parts of Virginia, Ohio, Kentucky and Pennsylvania. When you hear the word Vandalia you think of the people, culture and history of our region.

Vandalia Health currently has hospitals, outpatient offices and telemedicine centers across West Virginia as well as parts of Maryland, Pennsylvania and Ohio.

Mission, Vision & Values

Our Mission

Enhancing the health of our communities through clinical excellence one person at a time.

Vandalia Health

CAMC Women and
Children's Hospital

At CAMC Women and Children's Hospital, we provide surgical and medical pediatric specialty care to treat a wide variety of diseases and conditions, including experienced neonatal and pediatric intensive care units. For more than 30 years, we have delivered the expertise and compassionate care only a dedicated children's hospital can provide. Our focus on clinical quality and patient and family-centered care is unparalleled.

At CAMC Women and Children's Hospital, we provide surgical and medical pediatric specialty care to treat a wide variety of diseases and conditions, supported by experienced neonatal and pediatric intensive care units. Armed with pediatric-specific facilities and equipment, we provide a spectrum of care that includes more than 30 pediatric subspecialties:

- Adolescent Medicine
- Anesthesiology (in-house 24/7)
- Allergy/Immunology
- Cardiology
- Child Advocacy/Abuse
- Critical Care/Intensive Care
- Dentistry
- Developmental and Behavioral
- Emergency Medicine
- Endocrinology
- Gastroenterology
- General Pediatrics
- Hematology/Oncology
- Hospital Medicine
- Infectious Disease
- Maternal/Fetal Medicine
- Neonatology (in-house 24/7)
- Nephrology
- Neurology
- Ophthalmology
- Oral/Maxillofacial Surgery
- Otolaryngology/ENT
- Palliative Care
- Pathology
- Psychiatry and Psychology
- Pulmonology (including Cystic Fibrosis)
- Radiology
- Rheumatology
- Sleep Medicine
- Surgery
- Urology

Telemedicine centers and Mobile Medical Units

Our telemedicine program continues to grow as new centers are opened allowing patients to see a specialist virtually, **without driving long distances**. Additionally, our **Mobile Medical Units** are on the road several days a week providing patient care or being used to allow patients to get specialist care virtually. This graphic illustrates the many types of specialty care available through telemedicine in our hospitals and telemedicine centers.

Improving medicine through research

Clinical trial research is vital to the advancement of medical treatment and elimination of illnesses. With more than 300 active research studies and dozens of industry-sponsored clinical trials, we're providing residents local access to groundbreaking medical therapies that could enhance treatment options and improve quality of care.

Training tomorrow's providers

As a leading medical education and academic research institution, we are committed to the education and training of the next generation of physicians and healthcare professionals. With 24 physician residencies and fellowships and 30 training programs, we're training some of the brightest minds in medicine to provide better care and treatments so patients receive the best care close to home.

CAMC Center for Learning and Research

CAMC's Center for Learning and Research offers the most advanced simulation technology and real-world training for doctors, nurses and other medical professionals. Located across from CAMC Memorial Hospital in Charleston, WV, the Center for Learning and Research opened in August 2023 to provide residents, nurses and a variety of medical professionals the most life-like, realistic clinical training environment to learn, practice skills and utilize new equipment with a safe transfer of skills and knowledge to patient care.

The Center also serves as a learning environment for residents and students from affiliated universities nationwide and includes:

- Anatomage® 3D anatomy and virtual dissection platform
- Immersive virtual reality training simulation software
- High fidelity lifelike training mannequins
- 3 operating rooms
- 1 critical care room
- Labor and Delivery suite
- 5 training rooms
- 8 inpatient rooms
- 6 outpatient rooms

Vandalia Health Network

Vandalia Health Network is a clinically-integrated network (CIN) that gives physicians many opportunities. A CIN places the patient at the center of care and strives to deliver the right care at the right time and by the right provider. **It brings together physicians, hospitals and health systems through technology, shared data and performance benchmarks to improve quality of care, enhance patient experience and reduce health care costs.**
