

Vandalia Health

On September 1, 2022, CAMC Health System and Mon Health System combined to create Vandalia Health. Since then, Vandalia Health has continued to grow adding several hospitals and another system, Davis Health System.

Why name this multi-state health system Vandalia? The name draws on the history of our region. In the 1700s, Vandalia was the name the British gave our territory including – parts of Virginia, Ohio, Kentucky and Pennsylvania. When you hear the word Vandalia you think of the people, culture and history of our region.

Vandalia Health currently has hospitals, outpatient offices and telemedicine centers across West Virginia as well as parts of Maryland, Pennsylvania and Ohio.

Mission, Vision & Values

Our Mission

Enhancing the health of our communities through clinical excellence one person at a time.

Our Vision

Vandalia Health brings the highest quality health care to our communities through:

- Being the compassionate patient-centered provider of choice

Vandalia Health

CAMC Women and
Children's Hospital

CAMC Women and Children's Hospital is a 146-bed facility providing primary and specialty care for pediatric patients. For more than 30 years, we have delivered the expertise and compassionate care only a dedicated children's hospital can provide. Our focus on clinical quality and patient and family-centered care is unparalleled. We also have the most experienced neonatal and pediatric intensive care units in West Virginia.

At CAMC Women and Children's Hospital, we provide surgical and medical pediatric specialty care to treat a wide variety of diseases and conditions. Armed with pediatric-specific facilities and equipment, we provide a spectrum of care that includes more than 30 pediatric subspecialties:

- Adolescent Medicine
- Anesthesiology (in-house 24/7)
- Allergy/Immunology
- Cardiology
- Child Advocacy/Abuse
- Critical Care/Intensive Care
- Dentistry
- Developmental and Behavioral
- Emergency Medicine
- Endocrinology
- Gastroenterology
- General Pediatrics
- Hematology/Oncology
- Hospital Medicine
- Infectious Disease
- Maternal/Fetal Medicine
- Neonatology (in-house 24/7)
- Nephrology
- Neurology
- Ophthalmology
- Oral/Maxillofacial Surgery
- Otolaryngology/ENT
- Palliative Care
- Pathology
- Psychiatry and Psychology
- Pulmonology (including Cystic Fibrosis)
- Radiology
- Rheumatology
- Sleep Medicine
- Surgery
- Urology

Improving medicine through research

Clinical trial research is vital to the advancement of medical treatment and elimination of illnesses. With more than 430 active research studies and dozens of industry-sponsored clinical trials, we're providing residents local access to groundbreaking medical therapies that could enhance treatment options and improve quality of care.

Training tomorrow's providers

As a leading medical education and academic research institution, we are committed to the education and training of the next generation of physicians and health care professionals. With more than 25 residency and fellowship training programs, we're training some of the brightest minds in medicine to provide better care and treatments so patients receive the best care close to home.

CAMC Center for Learning and Research

CAMC's Center for Learning and Research offers the most advanced simulation technology and real-world training for doctors, nurses and other medical professionals. Located across from CAMC Memorial Hospital in Charleston, WV, the Center for Learning and Research opened in August 2023 to provide residents, nurses and a variety of medical professionals the most life-like, realistic clinical training environment to learn, practice skills and utilize new equipment with a safe transfer of skills and knowledge to patient care.

The Center also serves as a learning environment for residents and students from affiliated universities nationwide and includes:

- Anatomage® 3D anatomy and virtual dissection platform
- Immersive virtual reality training simulation software
- High fidelity lifelike training mannequins
- 3 operating rooms
- 1 critical care room
- Labor and Delivery suite
- 5 training rooms
- 8 inpatient rooms
- 6 outpatient rooms
